

DORMAN ENGINE OIL PANS

THE AFTERMARKET SOLUTION LEADER

Corrosion and road damage can lead an engine's oil pan to leak over time. Dorman already offers the aftermarket's largest selection of oil pans for today's most popular vehicles and continues to grow the segment by developing modern solutions, including aluminum and plastic construction, to precisely match original equipment designs.

220M + VIO and Growing

Direct replacements — made to exactly match the original pans on specific vehicles for proper fits

Complete assemblies — replacement pans include drain plug to match original components

Durable materials — pans made of stamped steel with high-strength, corrosion-resistant E-coating, cast aluminum, or injection-molded plastic to match the original equipment design

Limited lifetime warranty — free of material and manufacturing defects
